PROJECTS

Personal Financial Planning Case Study **Completed September 2026**
Excel Financial Modeling & Client Analysis

- Created an Excel-based client financial-planning workbook and dashboard to organize income, expenses, savings, debt, insurance considerations, and personal financial goals.
- Analyzed cash flow and spending patterns to identify savings opportunities, improve budget alignment, and prioritize short and medium-term goals.
- Converted financial data into structured planning observations and educational next steps, emphasizing cash-flow management, liquidity, debt considerations, and goal prioritization.

Restaurant Inventory & Budget Tracker **Completed July 2026**
Excel Model | Bo & Vine Burger

- Built dynamic Excel model forecasting weekly re-orders from inventory, rush forecasts, and budget caps; manager testing showed 20% increase in order savings.
- Integrated functions for cost projections and cash-flow analysis, enabling peak-demand spend optimization under weekly budget constraints.
- Developed with manager feedback; model demonstrated FP&A-style forecasting logic.

WORK EXPERIENCE

Preparation Cook **June 2024 – August 2026**
Bo & Vine Burger Eugene, OR

- Created daily prep lists based on inventory levels and peak-hour demand, improving kitchen efficiency and reducing ingredient waste.
- Communicated with kitchen staff to anticipate needs, reallocate tasks, and maintain smooth service in a high-volume setting.
